3 Product Description
CUSTOMTECH TechPatch - TW is a rapid-curing, calcium aluminate cement based compound used to fill and finish exterior and interior concrete and masonry vertical surfaces. Use to hide large and small chips, holes and irregularities on tilt-up concrete; casted concrete and other masonry surfaces before painting or sealing.

Key Features
- Superior mixing and handling
- Excellent for tilt wall patch and finishing
- Featheredge to deep fill
- Mix with water only
- Dries quickly 15-60 minutes

Composition of Product
CUSTOMTECH TechPatch - TW is a blend of Portland & calcium aluminate cement, inorganic fillers and polymers.

Packaging
10 lb. (4.5 kg) Bags

4 Technical Data
Environmental Consideration
Custom® Building Products is committed to environmental responsibility in both products produced and in manufacturing practices. Use of this product may contribute to LEED® certification.

5 Instructions
General Surface Prep
FOLLOW CURRENT OSHA (Occupational Safety and Health Administration) STANDARDS AND GUIDELINES FOR ALL PRACTICES DURING SURFACE PREPARATION AND PRODUCT APPLICATION. USE IMPERVIOUS GLOVES, such as nitrile, when handling product.

All surfaces must be structurally sound, clean, dry and free from contaminants that would prevent or inhibit bonding. Do not apply to surfaces that might experience continuous high moisture exposure or standing water.
Contaminants such as form releases should be mechanically removed before installation. Concrete surfaces must have a tensile strength in excess of 200 psi (1.4 N/mm²).

Mixing Ratios
Mix 2.25 – 2.50 qts (2.1 – 2.4 L) clean cool potable water to a 10 lb. (4.5 kg) bag of CUSTOMTECH TechPatch - TW.
