**CUSTOM TILE INSTALLATION SYSTEMS ACHIEVE
CSI'S COMPLIANT DOCUMENT REVIEW PROGRAM APPROVAL**

*CUSTOM's product guide specifications conforms
to Construction Specification Institute standards and formats for tile installation*

SEAL BEACH, Calif. – April 15, 2013 – To simplify construction specification writing for tile installation, Custom Building Products (<http://www.custombuildingproducts.com/>), a leading provider of tile, stone and flooring installation systems, today announced it has received approval of its tile installation systems product guide specification by the Construction Specification Institute (CSI) through its Compliance Document Review (CDR) program.

To obtain the CSI's CDR program approval, the CSI rigorously reviewed CUSTOM's tile installation product guide specifications to ensure they adhered to the principles set forth in CSI's published formats, best practices, and guidelines. CSI's reviewers have determined that CUSTOM's guide specifications are organized and structured correctly, and properly apply CSI's standards and formats.

“With the CSI's CDR program approval, CUSTOM is leading the way toward streamlining and minimizing the complexity that construction professionals face when specifying tile installation products,” said Steve Taylor, director of architecture and technical marketing for Custom Building Products. “Architects, designers, specifiers and contractors now have added peace of mind when specifying CUSTOM installation products, knowing that all installation standards, material applications and quality assurance qualifications have been confirmed by the CSI.”

(more)

CUSTOM tile installation systems product guide specifications will now feature the Compliant Document Review Program logo that signifies to construction professionals that the information offered saves time, reduces the number of change orders, and improves the accuracy of the specifications that make it into the project manual. CUSTOM guide specifications also conform to the intent expressed in the application guidelines provided in CSI's MasterFormat, SectionFormat and PageFormat.

The extensive catalog of CUSTOM tile installation systems brands and products identified in the approved guide specifications include:
