Application of Product

USE CHEMICAL-RESISTANT GLOVES, such as nitrile, when handling product.

Read entire label before using. Apply a coat of Grout Release, ensuring 100% surface coverage using a sponge applicator, heavy-textured paint roller or brush. Allow a minimum of 30 minutes drying time before grouting. Follow grout manufacturer's instructions for grouting process. Grout Release residue should be removed through normal grout cleanup process. If Grout Release residue remains on surface, use Aqua Mix® Heavy-Duty Tile & Grout Cleaner to remove. For most smooth porous surfaces, an application of sealer may be used in lieu of Grout Release prior to grouting.
