RedGard® Uncoupling Mat

1. Product Name

RedGard® Seam Tape

2. Product Description

RedGard® Seam Tape is a fast and easy way to cover seams and changes of plane when installing RedGard® Uncoupling Mat and Fabric Membrane to provide waterproofing and vapor barrier protection.

Key Features

- For seams and changes of plane
- Part of a waterproof/vapor barrier control system for walls and floors

Suitable Substrates

Use on the seams of the RedGard® Uncoupling Mat only

Benefits of Product in the Installation

- 100% waterproof protection for substrates
- Easy to cut and adjust
- Suitable for all tile types
- Use with polymer modified thin-set mortars

Limitations to the Product

RedGard® Seam Tape is not intended for use without a suitable substrate that can support the finished floor installation.

Application of Product

Install RedGard® Uncoupling Mat according to product instructions. To minimize installation duration, measure and cut the seam tape to size with a utility knife ahead of mixing thin-set for installation. Once the mat is installed, apply thin-set mortar into the top of the uncoupling mat where the seam tape will be applied. Using the flat side of a trowel or a taping knife, embed the RedGard® Seam Tape into the still wet thin-set. With firm pressure, work the trowel or taping knife at angles out and away from the center taking care to work out any air that may have been trapped when the seam tape was placed.

Cleaning of Equipment

Clean tools and hands with water before material dries.
