

# REDGARD® WATERPROOFING AND CRACK PREVENTION MEMBRANE RECEIVES IAPMO CERTIFICATION

RedGard® Waterproofing and Crack Prevention Membrane received IAPMO/Uniform Plumbing Code certification for use as a shower pan liner, File No. 4244. Installation requirements are the same as for use as a waterproof membrane.

RedGard® also meets ANSI A118.10 requirements for load-bearing, bonded, waterproof membranes for thin-set ceramic tile and dimensional stone installations. It's a water-based, ready-to-use, elastomeric waterproofing and anti-fracture membrane. It is easily applied with roller, trowel or sprayer, producing a continuous moisture barrier with outstanding adhesion.

RedGard® may be used for interior or exterior commercial and residential tile installations. Areas of use include vertical and horizontal applications that require integral waterproofing, such as steam rooms, shower pans, spas, countertops, balconies, kitchens and virtually anywhere a waterproofing material is specified. Its elastomeric properties also allow it to be used as a crack isolation membrane.

Please contact CUSTOM® Technical Services if a copy of the IAPMO certificate is required.

The information in this bulletin is presented in good faith, but no warranty, express or implied, is given nor is freedom from any patent in as much as any assistance furnished by CUSTOM® with reference to the safe use and disposal of its products provided without charge. Custom® Building Products assumes no obligation or liability therefore, except to the extent that any such assistance shall be given in good faith.
